

LA/OC SMTA is Proud to Present an Educational and Networking
Chapter Dinner Meeting

3D Printing Technology

SPEAKER

Russell Singer

Design and Development Director

MAKEiT Inc.

<http://www.makeit-3d.com>

PRESENTATION ABSTRACT

3D printing has gone from hobby to profession as it gains acceptance in a growing number of functional applications. From end-use products to machining jigs and fixtures, 3D printing can speed workflows, reduce production costs, and create novel designs. As with any other production method it's necessary to understand the benefits and trade-offs to make it work to your advantage. This talk discusses some basics of design-for-printing, 3D printing workflows in the professional environment, and examples of real-world use across a variety of applications.

SPEAKER PROFILE

Russell Singer is Design and Development Director at MAKEiT Inc. Prior to MAKEiT he worked as a design researcher at NASA/JPL. His technical background is Industrial Design with a BFA and MS from Carnegie Mellon University and Art Center College of Design, respectively.

DATE

Thursday, September 21st, 2017
(3rd Thursday of the Month)

AGENDA

6:00PM, Social Hour
